

# HLC Mark of Accreditation Status

Member institutions are required to display the HLC Mark of Accreditation Status on their websites as a part of HLC’s Obligations of Membership (Policy number INST.B.30.020).

## #12 Obligation of Membership

The institution portrays its accreditation status with HLC clearly to the public, including the status of its branch campuses and related entities. The institution posts the electronic version of HLC’s Mark of Accreditation Status in at least one place on its website, linking users directly to the institution’s status on HLC’s website.

The Mark of Accreditation Status, an interactive graphic installed through imbedded web coding, reflects the institution’s current accreditation status and links visitors to the institution’s Statement of Accreditation Status on HLC’s website.

Institutions are limited to one domain name for use of the Mark of Accreditation Status; however, the Mark may appear on more than one page under that same domain name.

There are multiple versions of the Mark of Accreditation Status, based on the accreditation status that institutions can hold with HLC. The version

of the Mark graphic being displayed on the member’s website will depend on the member’s HLC status.

The Mark of Accreditation Status coding allows for the graphic to change without action on the part of the institution when an institution’s status with HLC changes, e.g. imposition of a sanction or removal of a sanction or move from candidate status to an accredited institution.

There is no graphic change in the Mark of Accreditation Status for institutions placed under HLC Governmental Investigation Designation or HLC Financial Designation.
